PROFILE

Full-stack developer building production-grade applications with FastAPI and React. Experienced in designing REST APIs with JWT authentication, PostgreSQL and Redis backends, and React/React Native frontends. Built and tested AI-integrated platforms with async task processing, database migrations, and Docker containerization.

EDUCATION

Ajeenkya DY Patil School of Engineering | B.E. in Artificial Intelligence and Data Science | CGPA 8.4 2023 – 2027

- Coursework: Data Structures & Algorithms, Operating Systems, DBMS, Cloud Computing, Machine Learning

SKILLS

Technical: Python, JavaScript, SQL, REST APIs, FastAPI, Flask, HTML/CSS, React, PostgreSQL, Redis, JWT Authentication, RAG Pipelines

Libraries: NumPy, Pandas, Scikit-learn, LangChain, LangGraph

Process Skills: Debugging, Testing, SDLC, Clean Code, Problem-Solving, API Integration, Scalable Architecture

Tools: AWS, Git/GitHub, Jupyter Notebook, Docker, Excel, Postman

EXPERIENCE

Innomatics Research Labs - Agentic AI Intern (Remote) February 26 – April 26

- Engineered REST API endpoints using FastAPI for a gym management system handling member subscriptions, attendance tracking, and payment workflows, worked on scalable backend architecture for AI applications.
- Built and tested AI-driven application components using Python, LangChain, LangGraph.

PROJECTS

NyaayPath AI | AI Legal-Tech Platform ([view](#)) 04/26 – Present

- Built a full-stack AI legal-tech platform, using React, FastAPI, PostgreSQL, Redis, and AWS RDS for automated legal guidance and complaint drafting tailored to Indian legal workflows.
- Designed secure REST APIs with JWT authentication, Redis caching for scalable backend performance.
- Built hybrid RAG workflows using Groq, Mistral, and LangGraph for AI-assisted legal document generation.
- Implemented modular backend architecture with FastAPI microservices, PostgreSQL relational schema design, and AWS cloud deployment practices to ensure maintainability, scalability, and production readiness.
- Developed AI-powered PDF legal document generation aligned with Indian legal drafting workflows.

Closira | Full Stack Engineering Assignment ([Github](#)) May 26

- Completed assigned backend tasks: implemented 6 REST API endpoints for customer enquiry ingestion, SOP keyword matching, escalation, and follow-up; added Alembic migrations, structured JSON logging, and async background workers
- Delivered assigned frontend: built 4-tab React Native dashboard (Expo SDK 56, TypeScript) with reusable component library and React Context state management
- Wrote 17 pytest test cases covering all endpoints, edge cases, and DB fixtures

CERTIFICATIONS & ACHIEVEMENTS

- NPTEL Gold Elite in Neural Networks for Computer Vision and NLP ([link](#))
- AWS Academy Graduate – Cloud Foundations ([link](#))
- Finalist and Team Lead of National Level Hackathon - Pragyantra ([link](#))
- Python and Advanced Python Training — 30 Hours ([link](#))
